# Change your life with Implant Retained Dentures

Making the life changing decision to get dental implants can be difficult, but the capable teams at DentureTech and McIntosh Dental make it simple and accessible for many patients in the West Auckland area.

The highly experienced team at DentureTech provide advanced denture services to patients, ranging from creating modern dentures like the exclusive Euro range to the very popular DentureMax range and more recently, they have noticed an increasing demand for new generation implant retained dentures.

"Our exclusive ranges of dentures here at DentureTech are truly something special, we are now able to achieve a highly crafted and specialised dentures that look natural and fit incredibly well—our patients just love them. It's really surprising to see the positive changes a new denture can make to a person's appearance which in turn increases their self-confidence and value of life.

DR. ALEX MCINTOSH, A HIGHLY EXPERIENCED DENTAL SURGEON.

It really is an extreme makeover!" says Chris Pine, head clinical dental technician.

Chris Pine and the DentureTech team work with Dr. Alex McIntosh, a highly experienced and registered dental surgeon, is the head dentist and implant specialist of McIntosh Dental. Dr. McIntosh has an

extensive medical and surgical background. His experience and knowledge at placing dental implants is reinsuring to all of our patients.

Chris Pine and Dr. McIntosh firmly believe that everyone has the right to enjoy their favourite foods and feel confident and comfortable when they smile. Worrying about dentures

moving or dropping when you bite, laugh, chew and sing is a thing of the past, they say. Implant retained dentures are firmly held in place so patients can wave goodbye to sore irritated gums caused by denture movement.

Implant retained dentures can have a profoundly positive impact on a person's life, continues Chris Pine, head clinical dental technician. Once patients understand what is involved and the life changing benefits, there is no holding them back.

Both teams at DentureTech and McIntosh Dental take the time to discuss what patients want and explain how implant retained dentures can change their lives. The processes involved are very simple and straight forward and most patients are genuinely surprised at how easy it is.

After the initial consultation with DentureTech, where procedures, costs and timeframes are laid out, DentureTech then organises a consultation with Dr. McIntosh. Dr.

McIntosh then explains how he will place the implants and goes over the entire treatment plan. Both DentureTech and McIntosh Dental place a huge emphasis on their patients being well informed.

"I surgically place the titanium dental implants in the jaws of our patients," says Dr. McIntosh. "This gives us a strong foundation to hold the dentures in place. Many of our patients have no idea how much their lives will change with such a simple procedure."

Chris Pine and Dr. McIntosh have both lectured nationally and trained internationally. They have a hugely respected reputation in the dental industry and are jointly committed to the life changing benefits their patients can receive from implant retained dentures—making them a truly world-class team.
